

Endlaminates (electro motors)

Automotive | e-Drivetrain | HV E-motors

Print Date: 2024-04-10

Benefits

- · Reliable
- Long term high temperature resistant
- Good flowability enables thin wall designs
- · Durable
- Good electrical insulation
- · Creep resistant

Details

Stanyl® PA46 is the first high-temperature polyamide and the only aliphatic polyamide in its class, making it an ideal choice for applications such as endlaminates (electro motors). Due to a high temperature resistance, Stanul® PA46 is UL1446 class H certified. Its creep resistance at elevated temperatures, high toughness levels, and good electrical insulation properties make it a cost-effective solution. Stanyl® PA46 offers good flowability and processability that enables thin wall designs, while Xytron™ PPS allows for super high long term temperature resistance.

Products

ForTii® F11 PPA-GF30 FR(40)
